

CONTENTS

April 2010

FOREWORD	Thoughts Regarding Product Development Based on Customer-First Philosophy	1
	Senior Executive Director Hiroshi ITOH	
CONTRIBUTION	The Role of Tribology in Environmentally Friendly MQL Machining	2
	Kagawa University, Faculty of Engineering, Department of Advanced Materials Science Professor Toshiaki WAKABAYASHI	
SURVEY	JTEKT Group Activities to Develop and Design Environmentally Friendly Products	8
	K. HAYASHIDA	
TECHNICAL PAPERS	Strategy for Transfer Elemental Designing, Employing Physical Characteristic Modeling of Steering Maneuvering (First Report)	15
	S. NAKANO H. YOSHIMOTO S. KIMURA R. HAYAMA	
	Development of High-Precision Air Bearing Spindle	23
	R. TANASE K. OHTSUBO F. SUGIMOTO	
	Theoretical Analysis of Mechanical Efficiency in Vane Pump	28
	Y. INAGUMA	
TECHNICAL REPORTS	Environmental Analysis at JTEKT	36
	H. KUWABARA M. FURUHASHI M. HOKII	
	Development of EPS Energy Consumption Estimation Method	43
	K. IZUTANI Y. SHIMIZU	
	Super-low Friction Torque Technology of Tapered Roller Bearings for Reduction of Environmental Burdens	47
	H. MATSUYAMA K. KAWAGUCHI A. UEMURA N. MASUDA	
	Development of Minimized Coolant Supply Technology in Grinding (ECOLOG Grinding TYPE II)	54
	T. YOSHIMI S. OISHI S. OKUBO H. MORITA	
	Development of Waterproof Hall IC Torque Sensor	60
	K. HOTTA T. ISHIHARA	
	Improvement of Water Resistance of Idler Bearings with Rotating Outer Ring	65
	Y. TAKETANI K. YAMAGUCHI	
	Stress Analysis of Cross Groove Type Constant Velocity Joint	72
	H. SAITO T. MAEDA	
	Development of SelectG7 General Purpose Cylindrical Grinder	77
	E. FUKUTA
