

CONTENTS

June 2012

FOREWORD	Response to Energy Reforms	1
	Senior Executive Director Hitoshi SHIMATANI	
CONTRIBUTION	Toward Safety and Security Enhancement by Car Robotics	2
	Tokyo University of Agriculture and Technology Professor Masao NAGAI	
OUTLOOKS	Trends and Future Views on Automotive Rolling Bearing and Driveline Unit	6
	M. KITAMURA	
	Future Views on EPS System Technological Development	19
	H. MIYAZAKI	
POWER TRAIN	Estimation Theory of Temperature Rise on Sliding Contact Surfaces of Differential Mechanisms for Automotive Drivelines	23
	T. ONOZAKI T. KOBAYASHI H. SHIBATA	
	Effects of Roughness and Coating on Frictional Behavior of Planetary Gear Type Torque-Sensing LSD	29
	J. ANDO H. ANDO H. SAITO H. TAKUNO T. HARA N. SAKAI Y. YAMASHITA M. TOHYAMA T. OHMORI	
	Low Friction Torque Bearings for Differential Pinion	37
	H. OOSHIMA	
	Development of Phenolic Resin for Idler Pulley	44
	S. NAGAI	
	Thrust Needle Roller Bearings Used under Low Viscosity Lubrication Conditions	48
CHASSIS	2.5 th Generation Double-Row Tapered Roller Bearing Hub Unit for SUVs and Pickup Trucks	49
	K. FURUKAWA	
	Strategy for Transfer Elemental Designing and Employing Physical Characteristic Modeling of Steering Maneuvering (the Third Report)	54
	R. HAYAMA S. KAWAHARA S. NAKANO	
	Steering Actuator for Autonomous Driving and Platooning	61
	A. ISHIHARA Y. KUROMARU M. NAKA	
	Development of Rattle Noise Analysis Technology for Column Type Electric Power Steering Systems	66
	S. NISHIMURA S. ABE	
	Development of Steering Angle Sensor for EPS Integration	72
	Y. MURAKOSHI M. NAKAMURA	

	Column Type Electric Power Steering System for Super Sports Cars . . .	77
	New Spline Slider Type Intermediate Shaft	79
MACHINE TOOL MECHATRONICS etc.	High-Precision Machining of Aluminum Parts (As a Countermeasure for the Thermal Displacement of Transmission Cases)	81
	F. KODAMA	
	Development of a VGX-100 Super-Large Vertical Grinding Machine	86
	A. MAKIUCHI	
	Development of SFC Control Systems	91
	H. TAKAHARA	
	Vacuum Carburizing Furnace	95
FUNDAMENTAL TECHNOLOGY	Study on Measurement of Internal Defects by Infrared Thermography . . .	96
	Y. HIJI M. KIJU K. YAMADA L. LOU	
	Analysis of Distortion Mechanism of Rolling Bearing Rings in Normal Quenching and Carburized Quenching	100
	K. KIZAWA	
	High Efficiency and Tribology in Rolling Bearings	108
	H. MATSUYAMA
