Special Edition on Automotive Bearing Technologies

FOREWORD	No. 1 & Only One — Shaping a Better Future — 1 Senior Executive Director, Member of the Board H. MIYAZAKI
CONTRIBUTION	Core Technology Strategy from a Long-term Perspective 2 Prof. Yuichiro KATO Center for Social Contribution and Collaboration, Nagoya Institute of Technology
OUTLOOK	Technological Trends and Outlook of Automotive Bearings 14 K. YOKOTA
TECHNICAL PAPERS	Improvement of Bearing Life through Bonding of Non-metallic Inclusions with Matrix 22 T. SADA Y. NONAKA T. MIKAMI K. KIZAWA Grease Lubrication Technology for Reducing Noise in Rolling Bearings K. MIYAKE M. FURUHASHI K. YOSHIZAKI 29 Study on Measurement of Dynamic Performance of Ball Bearing for Auto-tensioner A. NAKASE T. MIZUNO L. LOU 39
TECHNICAL REPORTS	High Efficiency and Lightweight Technology of Automotive Parts for Energy Saving H. MATSUYAMA 46 Development of Needle Roller Bearing for High-efficiency Planetary Gear 54 M. TANIYAMA K. KOTANI Y. NAKASHIMA T. SATOU Development of Anti-Creep Ball Bearing for Outer Ring 59 Y. ISHII T. JINBO HUBLFT: Hub Unit for Low Friction Torque 64 S. YAMANE T. OGIMOTO Development of Next Generation Low Friction Torque Tapered Roller Bearing (LFT-IV) D. OKAMOTO A. SUZUKI T. AIDA K. NAITO 69 Technical Trends Regarding Rolling Bearings Used with Balancer Shaft Systems in European Engine Applications S. MESCHER 74 Effective Convergence Type Problem-solving Technique for North American Automotive Products and Manufacturing Processes M. MCKEEL 79 Development of Thermal Processing Tool for Minimal Fab 86 S. SUZUKI

NEW	Bearing with Special Coating	90
PRODUCTS	Sliding Door Bearings with High Corrosion Resistance	91
	Rolling Bearing Unit Usable at High Temperature and High Speed	
	Application for Supercharger	92
	3 rd Generation Tapered Roller Hub Unit	93

GLOBAL NETWORK
