JTEKT CORPORATION

**Vision behind this name:**

Be a technology-oriented company able to move industries, the times, and people's hearts.

JTEKT Corporation. Through the merger of their knowledge and experience, Koyo Seiko and Toyota Machine Works have formed a company with the technical capability to achieve dramatic manufacturing innovation in Japan and worldwide based on highly reliable and advanced technology. JTEKT's commitment is to obtain the satisfaction of customers and contribute strongly to the advance of a sustainable society.

**Front Cover: Fujisan, sacred place and source of artistic inspiration**

You may have seen a photograph capturing Fujisan (Mt. Fuji) and a Shinkansen bullet train. Mt. Fuji is renowned for its beauty from season to season, and this photograph taken in spring shows a spectacular and beautiful meadow of *renga* flowers in the foreground. The mountain is an active volcano with an elevation of 3,776 meters, spanning across Shizuoka and Yamanashi Prefectures. In Japan, Mt. Fuji has been the object of pilgrimage for centuries, although beliefs have changed with the times, and even today, it attracts many pilgrims. With its majestic and beautiful natural features, Mt. Fuji has also been the inspiration for many artistic works, such as *waka* and *haiku* poems and *ukiyo-e* woodblock prints. Since ancient times, Mt. Fuji has had a profound influence on the Japanese people's view of nature as well as Japanese culture; for this reason, its 25 constituent sites, including the mountain area, were registered as a UNESCO World Cultural Heritage Site under the title "Fujisan, sacred place and source of artistic inspiration" in 2013.
