## Annual Report 2007 For the year ended March 31, 2007

#### MESSAGE FROM THE CHAIRMAN AND THE PRESIDENT

It is our pleasure to report to you on JTEKT's business performance for the fiscal year ended March 31, 2007.

Concerning the state of Japan's economy during this period, although the effect of such negative factors as increased raw material prices was felt, the economy continued to display moderate strength as a result of increased private-sector capital expenditures, an expanding employment environment, and other positive factors.

Regarding economies around the world, Asian economies led by China maintained a high growth rate, the U.S. economy displayed firmness despite the failure of personal consumption to grow as expected, and European economies proceeded strongly in the direction of recovery.

Given such a business climate, the JTEKT Group endeavored during this period to construct a production structure with improved efficiency and further strengthen its quality control and sales structures.

As a result of these and other efforts, consolidated sales of 1,025,298 million yen were achieved, an increase of 300,948 million yen, or 41.5 percent, over the previous year's result. Concerning profit, rising raw material prices and other unfavorable factors were offset by increased sales, resulting in consolidated operating income of 64,630 million yen, an increase of 20,005 million yen, or 44.8 percent, over the previous term. Consolidated net income rose to 44,900 million yen, an increase of 17,614 million yen, or 64.6 percent, over the previous term.

An end-of-term dividend of 10 yen per share was issued, bringing the total dividend for the year to 19 yen per share (the interim dividend was 9 yen per share), an increase of 4 yen per share from the previous term.

The JTEKT Group will continue striving to strengthen its quality control structure, develop new products that foresee market needs, and solidify its base of profitability through the effective use of management resources in order to meet the expectations of customers and others.

We hope for the continued support and cooperation of our shareholders.

August 2007

Chairman Takaya Yamada

President Motohiko Yokoyama

## **Consolidated Financial Highlights**

#### Consolidated sales Consolidated operating income Consolidated net income (unit: billions of yen) (unit: billions of yen) (unit: billions of yen) 44 64 1,025 1,000 60 40 900 50 800 44 724 30 27 700 40 570 600 30 500 30 16 400 20 300 200 10 100 0 ~3/05 ~3/06 ~3/05 ~3/06 ~3/06 ~3/07 Note: JTEKT's $\sim$ 3/06 results are a combination of the results of Koyo Seiko (the surviving legal entity) Koyo Seiko from April through December 2005 and JTEKT's results from January through March 2006. JTEKT

### **Business Domains**

Three axes and four product fields compose the structure of JTEKT. The horizontal axis represents systemization that will apply to a wide range of industrial fields, and in particular the systemization of steering products and driveline components. Supporting that axis is the technology "deep plowing" axis, representing further cultivation of fundamental technology in the fields of bearings, a basic element of all mechanical products, and machine tools, the means by which products are manufactured. Extending to an equal extent in the upward direction is the advanced technology development axis. Through utilizing the synergy created between these three axes and four product fields, JTEKT will pursue new possibilities and provide customers with the best in intelligent motion technology.

#### **Main Products**

#### **Steering systems**

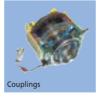

Electronically controlled variable gear ratio steering

#### **Driveline components**

#### **Bearings**

Automotive bearings (hub unit with built-in

#### Machine tools

# Aiming to be a "monozukuri" company friendly to the global environment

Realization of "eco-factories"Provision of energy/resource-saving recyclable products

## JTEKT products contributing to the global environmental

High-efficiency JTEKT Involute Chain for CVTs

Currently there is a strong trend among automakers to adopt continually variable transmissions (CVT) as a means of improving vehicle fuel economy. While both metal belts and chains are used in current CVTs, JTEKT, utilizing its wealth of bearing element technology and based on an exclusive license agreement with Dutch company Gear Chain Industrial B.V., has developed the JTEKT Involute Chain, which possesses higher efficiency than existing metal belts and lower noise than existing chains.

#### **Features**

In the 10/15 fuel efficiency measurement mode, a 4%~5% fuel efficiency improvement is achieved (in-house calculation). Application in high torque ranges, which are difficult for current products to handle, is possible. This will enable CVT application on a greater range of vehicles and contribute to energy and resource conservation.

## Rack direct-drive electric power steering with integrated electronically controlled variable gear ratio mechanism

Received Automotive Component Award at 4th Monozukuri Component Awards Ceremony

This system, installed on Toyota Motor Corporation's Lexus LS and representing world-leading steering technology, comprises an electronically controlled mechanism that changes the gear ratio integrated in a one-piece structure with a rack direct-drive type electric power steering system having world top-class output. The variable gear ratio mechanism changes the steering gear ratio in accordance with vehicle speed so that the tires turn relatively much in response to turning at slow speeds or in stationary condition and relatively little in response to turning at high vehicle speeds, which improves driving stability.

#### Features The high or

The high output of this system enables application on large vehicles up to the 5-liter class, and as vehicles equipped with electric power steering achieve 3%~5% better fuel efficiency than those using hydraulic power steering, it contributes significantly to energy conservation as well as to driving safety.

Low friction torque (LFT-III) tapered roller bearing receives Minister of Economy, Trade and Industry Award

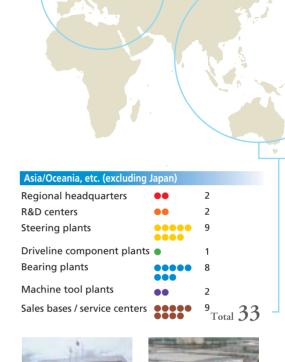

#### eatures

This bearing, which has 80% less rotational torque loss than conventional tapered roller bearings, received the Minister of Economy, Trade and Industry Award at the 2006 Energy-Conserving Machinery Awards in recognition of its significant energy-savings benefit.
